

## Homework 26b Energy from the Sun

The information shown in the table below is all about the energy resources used in Jouleland in 1996. It lists the energy sources and gives for each one its percentage of the total energy used in that country.

Source	% of total
Biomass	10
Coal	20
Gas	15
Hydro-electric	10
Nuclear	8
Oil	32
Others	

1. Which are the fossil fuels?
2. Which of the sources includes burning wood for fuel?
3. Which of the sources listed are renewable?
4. What should the percentage for 'Others' be?
5. Jouleland is a rapidly developing country. Imagine you are its Minister of Energy. Outline your plans for the future, giving reasons for favouring some energy resources over others.
